On-Site Trailer Inspection Program

With large success in 2025, Clubhouse Trailers is proud to continue the On-Site Trailer Inspection Program for 2026. The Clubhouse will have team members traveling through the Oklahoma and Texas area, and can help you inspect, maintain, troubleshoot, and upgrade your trailer. We will have limited spots available for each region, so if you are interested, please fill out this form, [available here](#). This inspection program is intended to help you identify any areas of concern, or systems that need attention. We will do our best to fix small issues (loose & missing fasteners, 3d printed items, etc), however some items may need repair beyond the scope of the inspection program.

Inspection Coverage

In the spring time, Clubhouse Trailers sends out a Maintenance Checklist to make sure your Clubhouse Trailer is ready for marching season. If you haven't seen it, or need another copy, you can download and print a copy [here](#). In addition to the Maintenance Checklist, Clubhouse Trailers has created a comprehensive 68pt+ inspection checklist, making it easy to identify areas and systems that need attention.

The on-site inspection is primarily designed for semi trailer builds, but Small Trailer Solutions customers are more than welcome to sign up for this as well.

The main review areas of this on-site inspection include the appropriate operation and condition all of the following:

- Stairs
- Batteries, Electrical System, Solar Charging System, Lighting
- Shelving
- Trailer Running Gear (this does not include areas covered by an annual DOT Inspection), door latches, wind latches & holdbacks.
- 3D Printed Parts
- Ramp(s)
- Tubavator
- Director's Perch
- Door Safety Bars, Railings & Gates
- Color Guard Drawers

Inspection Limitations

This inspection is intended to be a "wellness checkup" on trailers. If there is something that needs servicing on your trailer, please let us know ahead of time so we can plan accordingly. Not all repairs can be performed on-site, and some repairs may require fees and approval by your district prior to service.

To ensure that our Clubhouse Team Member is able to inspect all areas of your trailer, please make sure the following requirements are met:

- Trailer has a minimum of 15 feet of clearance at the back of the trailer if equipped with a powered ramp
 - Ramp inspection will not be performed if this requirement is not met.
- Power outlet is available within 50 feet of the trailer.
- Trailer has a minimum of 5 feet of clearance on either side
 - Inspection of stairs may not be performed if this requirement is not met.
- Trailer is parked on level ground.

Hardware Replacements.

Common-type hardware will be replaced as inventory on-hand allows. Unless The Clubhouse is notified prior, more speciality hardware may not be in our inventory with us, and may need to be sent after the fact for an additional cost.

Systems Repairs

This list is not exhaustive of all repair prices, but represents major areas that we can replace in the field.

- Replacement Batteries - \$910.33
 - New Batteries are recommended every 3 years.
- Replacement Solar Panels
 - Includes adhesives, hardware, solar panel wiring covers.
 - \$425 ea
- Replacement Actuators - Price varies per actuator type - see Update PDF in the Summer Maintenance Newsletter

Field Upgrades

If you are interested in additions to your trailer, some of these can be installed without a trip back to The Clubhouse.

- Ramp Control Upgrade
 - This allows more control over ramp operation, with individual buttons for the main and fold sections, you can lift the ramp over curbs, large concrete seams, and other obstructions.
 - Upgrade from a door-mounted switch to a hard-wired pendant.
 - If you already have a pluggable pendant (hydraulic ramp), we will hard-wire a new pendant.
- Drum Carrier Grid
 - See pictures on our website [here](#).
- Clubhouse Trailers Toolbag

- All of the hand tools required to maintain your Clubhouse Trailer. Comes with an e-track hanger.

Inspection Timeline

The Clubhouse is aiming to make several trips throughout Texas and across the rest of the country starting in May. By filling out our interest form, you can help us combine multiple inspections in the same geographic area.

Clubhouse Trailers consists of less than one dozen full-time team members. Jeff, Brandon, Connor, or Tyler will be taking time away from The Clubhouse to be performing these inspections.

Inspection Pricing

- Regular Inspection Pricing \$535
 - + trip fee \$425 over 150 miles
- 50% due at time of scheduling
- 50% due net 30 after inspection + any additional hardware and service costs.
 - Additional services will be required to be approved prior to work being performed.

Add your trailer to the inspection list here: [2026 On-Site Inspection](#).
We will schedule with you in the coming weeks to determine best timing.
